

The Community uses its resources wisely for the needs of current and future generations

- 1 Land use maximizes the potential of natural environment
 - (1) Urban and Natural Spaces are integrated
 - (2) Neighborhoods have interconnected networks of open spaces that include existing or enhanced natural and conservation areas or are a response to natural features

- 2 Resource use minimizes the impact on the natural environment

- 3 An environment where citizens/organizations minimize their ecological footprint
 - (1) Neighbourhoods are in compact urban form
 - (a) Higher density housing is clustered and located with mixed uses and public transit
 - (2) Infrastructure can be easily adapted to alternative energy sources and servicing

- 4 Neighborhoods can accommodate a variety of future uses that will allow buildings, public spaces, and neighbourhood amenities to be converted, salvaged, or reused
